Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: Claim 1 has some awkward language such as "for there being relative rotation" and "pivotally borne". Such language should be changed to more suitable language.. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Seibold (U.S. Patent No. 6,209,955).

Seibold teaches the structure as claimed (See Figures 2 and 4-6)

Claims 1-4 and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Whalen (U.S. Patent No. 5,476,307).

Whalen teaches the structure as claimed (See Figures 1-3)

Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hansel et al (U.S. Patent No. 6,540,232).

Hansel et al teach the structure as claimed (See Figures 1-3).

Claims 1-3 and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Boltze et al (U.S. Patent No. 6,598,938).

Boltze et al teach the structure as claimed (See Figures 1 and 3-4).

Claims 5-6 and 12-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Prior art does not teach that structure of the second mouths as defined in claims 5, 12, 14, and 16.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Deptolla, Ward et al, Brambilla, Allen, and Ziegler et al, teach structure similar to the present invention .
